Primarily a frontend engineer, with full-stack experience. I've owned multiple features, taking responsiblity for planning, development, and release.

I also have product design experience (in-house & freelance). My blended skills let me bridge gaps within product teams and ship polished interfaces.

Work

Full-Stack Engineer — Wavy — Jan 2023 - Mar 2023

- Ruby on Rails
- View Components
- TailwindCSS

Owned development & design of key features. Conceptualized & pitched projects. Maintained production code quality via code review & bug fixing.

Polls — Designed & built a feature allowing teams to vote for their next event. Saved Sales and CS teams 5 hours of work per week.

Saves & Collections — Co-designed and built a feature that allows people to save & compare events. Saved sales 5 hours/week of creating proposals.

Junior Full-Stack Engineer — Wavy — Feb 2022 - Jan 2023

- Ruby on Rails
- Auth0
- React

Owned development of key features. Worked with design to develop and maintain Wavy's design system.

Authentication + Onboarding — Co-designed, built, and led a project to add robust user authentication & onboarding. Led to 50 sign-ups in the first few months.

Custom Content — Built a bulk & multi-step flow for companies to add and edit events. Became a key feature of the platform.

Projects

Formie — Created a tool to make beautiful UI for any smart contract (Next.js & Firebase). Featured by The Milk Road.

Scope Todo — Created a collaborative todo widget for Figma & Figjam (React) with 25k+ downloads.

Education

Bachelor of Commerce — Dalhousie University — Sep 2016 - Apr 2021

Technologies

Next.js, React, Javascript, Typescript, HTML, CSS, TailwindCSS, Sanity CMS, Ruby on Rails, View Components, Git, PostgreSQL Auth0, Firebase, S3
